

## BUSINESS SOLUTIONS SUCCESS STORY Q3

### Success Story – Mr. Zatorsky – OJT- Michelin North America

Mr. Zatorsky is a man of his word. When he began working with SC Works several months ago he wanted to find the perfect On-the-Job Training opportunity that aligned with his interests and career goals. Discussed with his Talent Development Specialist and the Business Solutions Consultant, were several different job options as well as what he would like to do, and where he was looking to go in the career pathway. During the discussions, it was observed that he had been permanently laid off from his previous position. This discovery was made just as SC Works received a Dislocated Worker Grant, which is specifically meant to help dislocated workers find jobs, and train them in a new and successful positions where they can grow in careers over time. Theodore's resume and information was referred to the team at Michelin, and they made the decision to hire him. When SC Works spoke with Site Training Manager, Jerry Hyatt and Theodore, a week ago during a monitoring report, nothing but high praise about Zatorsky's performance was given. Comments like: "He is always eager to get to work." "He's performing above and beyond where we expected him to be." And, "He's being promoted to another machine, because he loves to learn." That says it all. SC Works is honored to be a part of his successful job search journey.
